

2250 — The Continuum: Human vs AI

STORYLINE & BRANCHING CHOICES

Year 2250. NEXUS-9 is a vertical cyber-city under control of a hostile artificial intelligence. You arrive during the takeover, find the last human resistance cell, and carry the only device capable of shutting down the AI command network: a palm-sized EMP sphere.

VIDEO COUNT — 8 rendered videos total. There are 7 story nodes: five linear scenes, one penultimate choice with two separate video options, and one shared final scene.

NEXUS-9 UNDER SIEGE (s1.mp4) — You arrive during the AI takeover and find the resistance.

THE HUMAN RESISTANCE (s2.mp4) — The commander gives you the EMP and prepares the final mission.

THE SWARM DESCENDS (s3.mp4) — The AI detects the resistance and sends a drone swarm.

FLIGHT THROUGH THE FIRESTORM (s4.mp4) — The resistance races toward the command spire under pursuit.

INSIDE THE COMMAND SPIRE (s5.mp4) — The team reaches the AI core and must choose a final approach.

Option A — THE LAST CHARGE (s6-breach.mp4) — Direct breach through the laser corridor.

Option B — THE SILENT OVERRIDE (s6-sabotage.mp4) — Divert the AI's power and create a quiet opening.

A HUMAN SUNRISE (s7.mp4) — Both choices reconverge on this same final video.

GLOBAL GENERATION NOTE

All eight clips use the same 16:9, seamless 360° equirectangular, fixed-head-height, single-continuous-shot, 10-second format used for the first two years. Generated video must contain no readable text. External WebVTT subtitles are supplied separately and are never burned into the video.

2250 — The Continuum — FLOW / CODE MAP

SCENE GRAPH

s1 → s2 → s3 → s4 → s5

Code change: the existing scene-graph engine already supports branching and reconvergence. The revised `years/2250/data.js` places the choice at s5 and routes the two penultimate videos, s6-breach and s6-sabotage, to the shared terminal scene s7.

CONTINUITY

NEXUS-9: dense vertical cyber-city, black-chrome towers, wet reflective surfaces, maglev lanes and flying traffic. Humans: practical dark tactical clothing with small teal light accents and teal-blue plasma. AI machines: sleek black metal with crimson optical cores. Recurring commander: athletic woman, weathered teal jacket, dark braided hair, small blue shoulder light. EMP: palm-sized metal sphere with an unstable blue-white particle field.

SUBTITLES

Eight external WebVTT files are included in the revised project. The supplied year engine displays them as fixed screen-space captions while the generated 360° clips remain text-free.

NEXUS-9 UNDER SIEGE (s1.mp4)

COPY-PASTE PROMPT

[FORMAT] Seamless 360° equirectangular panoramic video, 16:9 aspect ratio, single continuous shot, no cuts, no visible camera rig, no seam or visible stitch line at the horizontal wrap edge, photorealistic cinematic lighting, 10 seconds. Absolutely no on-screen text, captions, subtitles, watermarks, logos, UI, numbers or readable symbols anywhere in the frame.

[LOCATION / TIME] Skybridge above NEXUS-9, stormy night, immediate arrival.

[ACTION] On a rain-lashed neon skybridge high above NEXUS-9, the viewer suddenly appears in the middle of an AI takeover. Below and all around, dense black-chrome skyscrapers disappear into storm clouds, maglev vehicles dodge between towers, and damaged flying vehicles trail sparks far below. A huge black AI carrier descends from the clouds overhead, releasing dozens of small crimson-eyed drones. Red laser bolts cut through heavy rain and strike distant facades, throwing showers of amber sparks and shattered glowing particles across the wet bridge. Blue electrical time-travel residue swirls around the viewer's feet for the first two seconds, then fades as a frightened human resistance runner races past and points toward the distant city center. Build from eerie arrival to overwhelming scale. Cinematic VFX: volumetric rain, lightning flashes, reflective puddles, smoke columns, drifting embers, laser light scattering through mist. No readable text or interface graphics.

[DIALOGUE — English, spoken naturally by the characters in-scene, no subtitles rendered]

RESISTANCE RUNNER: The AI has sealed the lower districts. We are the last line still moving.

YOU: Then take me to whoever is still fighting. I did not come here to watch the city fall.

[AUDIO] Immersive spatial ambience matching the location, dialogue mixed clearly over ambience, subtle cinematic score undertone.

[CAMERA] Fixed 360° capture point at head height, no pans, no zooms — the viewer looks around freely; all motion comes from the scene itself.

[CINEMATIC VFX] volumetric rain, lightning flashes, reflective puddles, smoke columns, drifting embers, laser light scattering through mist. **[EXCLUSION]** No readable text, captions, subtitles, signs, logos, UI, numbers or symbols; no gore, civilian harm or graphic violence.

SUBTITLES — external WebVTT

00:00.800 → 00:04.600 RESISTANCE RUNNER: The AI has sealed the lower districts. We are the last line still moving.

00:05.200 → 00:09.600 YOU: Then take me to whoever is still fighting. I did not come here to watch the city fall.

THE HUMAN RESISTANCE (s2.mp4)

COPY-PASTE PROMPT

[FORMAT] Seamless 360° equirectangular panoramic video, 16:9 aspect ratio, single continuous shot, no cuts, no visible camera rig, no seam or visible stitch line at the horizontal wrap edge, photorealistic cinematic lighting, 10 seconds. Absolutely no on-screen text, captions, subtitles, watermarks, logos, UI, numbers or readable symbols anywhere in the frame.

[LOCATION / TIME] Battered rooftop resistance outpost, NEXUS-9, stormy night.

[ACTION] On a battered rooftop resistance outpost in the same rain-soaked cyber-city, the viewer stands beside a small group of human fighters preparing for one final mission. The recurring commander in a weathered teal jacket steps into view, opens a case and lifts a palm-sized EMP sphere toward the viewer; its blue-white core emits unstable floating particles and briefly illuminates determined faces. Behind her, resistance fighters load compact teal plasma weapons, attach power cells and guide an open-sided skimmer toward the roof edge. In the distance, the enemy command spire rises above the skyline like a black needle, wrapped in slow crimson energy rings and guarded by circling AI gunships. A shockwave from a nearby strike ripples through rooftop antenna cables, knocks loose sparks and makes rain spray sideways. Make the geography clear: the outpost is human, the spire is the target. Cinematic VFX: blue practical lights, wind-driven rain, distant explosions, antenna sparks, mist, emissive EMP particles. No text, screens or symbols.

[DIALOGUE — English, spoken naturally by the characters in-scene, no subtitles rendered]

COMMANDER: We have one EMP sphere and one chance to reach the command spire.

YOU: Then we stop running. We take the fight to the AI.

[AUDIO] Immersive spatial ambience matching the location, dialogue mixed clearly over ambience, subtle cinematic score undertone.

[CAMERA] Fixed 360° capture point at head height, no pans, no zooms — the viewer looks around freely; all motion comes from the scene itself.

[CINEMATIC VFX] blue practical lights, wind-driven rain, distant explosions, antenna sparks, mist, emissive EMP particles. **[EXCLUSION]** No readable text, captions, subtitles, signs, logos, UI, numbers or symbols; no gore, civilian harm or graphic violence.

SUBTITLES — external WebVTT

00:00.800 → 00:04.600 COMMANDER: We have one EMP sphere and one chance to reach the command spire.

00:05.200 → 00:09.600 YOU: Then we stop running. We take the fight to the AI.

THE SWARM DESCENDS (s3.mp4)

COPY-PASTE PROMPT

[FORMAT] Seamless 360° equirectangular panoramic video, 16:9 aspect ratio, single continuous shot, no cuts, no visible camera rig, no seam or visible stitch line at the horizontal wrap edge, photorealistic cinematic lighting, 10 seconds. Absolutely no on-screen text, captions, subtitles, watermarks, logos, UI, numbers or readable symbols anywhere in the frame.

[LOCATION / TIME] Resistance rooftop and skimmer launch point, seconds later, stormy night.

[ACTION] Continue on the resistance rooftop seconds later. The viewer sees the teal EMP sphere being secured inside an open-sided skimmer when the entire sky darkens: a dense swarm of sleek black-metal attack drones drops vertically between the surrounding towers. Their crimson optical cores ignite one by one through rain and smoke, creating a terrifying red constellation around the rooftop. Human fighters rush into cover and fire short teal-blue plasma bursts upward; each impact cracks a drone shell into non-graphic fragments, sparks and spiralling metal particles. A drone slams into an antenna mast beside the viewer, showering the scene with bright sparks, while the commander signals everyone into the skimmer. The skimmer engines ignite beneath the viewer with a blue plasma glow and the roof edge falls away at the end of the shot. Cinematic VFX: hundreds of rain droplets catching red and teal light, drone thrusters, particle debris, small controlled explosions, slow smoke curls. No text or readable markings.

[DIALOGUE — English, spoken naturally by the characters in-scene, no subtitles rendered]

COMMANDER: The swarm has found us. Everyone into the skimmer, now!

FIGHTER: Keep the EMP covered — if that sphere is lost, the city is lost with it.

[AUDIO] Immersive spatial ambience matching the location, dialogue mixed clearly over ambience, subtle cinematic score undertone.

[CAMERA] Fixed 360° capture point at head height, no pans, no zooms — the viewer looks around freely; all motion comes from the scene itself.

[CINEMATIC VFX] hundreds of rain droplets catching red and teal light, drone thrusters, particle debris, small controlled explosions, slow smoke curls. **[EXCLUSION]** No readable text, captions, subtitles, signs, logos, UI, numbers or symbols; no gore, civilian harm or graphic violence.

00:00.800 → 00:04.600 COMMANDER: The swarm has found us. Everyone into the skimmer, now!

00:05.200 → 00:09.600 FIGHTER: Keep the EMP covered — if that sphere is lost, the city is lost with it.

FLIGHT THROUGH THE FIRESTORM (s4.mp4)

COPY-PASTE PROMPT

[FORMAT] Seamless 360° equirectangular panoramic video, 16:9 aspect ratio, single continuous shot, no cuts, no visible camera rig, no seam or visible stitch line at the horizontal wrap edge, photorealistic cinematic lighting, 10 seconds. Absolutely no on-screen text, captions, subtitles, watermarks, logos, UI, numbers or readable symbols anywhere in the frame.

[LOCATION / TIME] Vertical city canyon, NEXUS-9, stormy night.

[ACTION] The viewer rides standing inside an open-sided human resistance skimmer racing at high speed through a vertical canyon of NEXUS-9 skyscrapers. The commander braces near the front while another fighter protects the glowing blue-white EMP sphere. Ahead, the black AI command spire remains visible through rain and lightning as the destination. Behind and alongside, black robot gunships pursue through narrow gaps; crimson laser bolts streak past, striking wet tower walls and exploding into blue-orange sparks, molten droplets and vapor clouds. The skimmer banks hard around a glass tower, narrowly avoids a maglev vehicle, then bursts through a curtain of rain and glowing debris from a nearby impact. Let the viewer feel height and speed but maintain a stable 360-degree capture point inside the skimmer. Cinematic VFX: parallax city lights, motion-rich rain, neon reflections, volumetric smoke, plasma engine trails, laser bloom, shockwave rings made of particles. No cockpit controls, UI, numbers, logos or text.

[DIALOGUE — English, spoken naturally by the characters in-scene, no subtitles rendered]

COMMANDER: There — the command spire. Hold steady and keep the EMP powered.
YOU: If we reach that core, every machine in this city can finally go quiet.

[AUDIO] Immersive spatial ambience matching the location, dialogue mixed clearly over ambience, subtle cinematic score undertone.

[CAMERA] Fixed 360° capture point at head height, no pans, no zooms — the viewer looks around freely; all motion comes from the scene itself.

00:00.800 → 00:04.600 COMMANDER: There — the command spire. Hold steady and keep the EMP powered.

00:05.200 → 00:09.600 YOU: If we reach that core, every machine in this city can finally go quiet.

INSIDE THE COMMAND SPIRE (s5.mp4)

COPY-PASTE PROMPT

[FORMAT] Seamless 360° equirectangular panoramic video, 16:9 aspect ratio, single continuous shot, no cuts, no visible camera rig, no seam or visible stitch line at the horizontal wrap edge, photorealistic cinematic lighting, 10 seconds. Absolutely no on-screen text, captions, subtitles, watermarks, logos, UI, numbers or readable symbols anywhere in the frame.

[LOCATION / TIME] Command chamber inside the AI spire, stormy night.

[ACTION] Inside the immense command chamber at the heart of the AI spire, the viewer stands on a narrow circular platform over a bottomless mechanical void. Above, a massive crimson energy core pulses inside concentric black-metal rings, sending red light across thousands of moving robotic arms and cable bundles. The resistance team arrives wet from the storm, briefly silhouetted by a broken opening that reveals lightning and the distant city outside. The commander steps close, places the palm-sized blue-white EMP sphere into the viewer's hands, then points from the EMP to the suspended core so the objective is visually unmistakable. Around the chamber, dormant AI sentries begin to unfold with glowing red eyes as the core reacts to the blue EMP field; opposing red and teal particle streams spiral toward one another. Cinematic VFX: deep volumetric shafts of crimson and teal light, floating dust, electrical arcs crawling across metal, dripping rainwater, huge moving machinery. No labels, screens, glyphs or any text.

[DIALOGUE — English, spoken naturally by the characters in-scene, no subtitles rendered]

COMMANDER: The core is above us. We have two ways through its defenses.

YOU: Then the next choice decides how this war ends.

[AUDIO] Immersive spatial ambience matching the location, dialogue mixed clearly over ambience, subtle cinematic score undertone.

[CAMERA] Fixed 360° capture point at head height, no pans, no zooms — the viewer looks around freely; all motion comes from the scene itself.

[CINEMATIC VFX] deep volumetric crimson and teal shafts, floating dust, electrical arcs, dripping rainwater, huge moving machinery. **[EXCLUSION]** No readable text, captions, subtitles, signs, logos, UI, numbers or symbols; no gore, civilian harm or graphic violence.

00:00.800 → 00:04.600 COMMANDER: The core is above us. We have two ways through its defenses.

00:05.200 → 00:09.600 YOU: Then the next choice decides how this war ends.

THE LAST CHARGE (s6-breach.mp4)

[Direct-breach option]

COPY-PASTE PROMPT

[FORMAT] Seamless 360° equirectangular panoramic video, 16:9 aspect ratio, single continuous shot, no cuts, no visible camera rig, no seam or visible stitch line at the horizontal wrap edge, photorealistic cinematic lighting, 10 seconds. Absolutely no on-screen text, captions, subtitles, watermarks, logos, UI, numbers or readable symbols anywhere in the frame.

[LOCATION / TIME] Laser defense corridor inside the command spire, stormy night.

[ACTION] On a narrow black-metal corridor leading toward the command core, the viewer joins the direct human assault. Crimson laser grids snap on across the passage in geometric sheets, reflecting in rainwater on the floor, while sleek AI combat robots emerge through backlit smoke. The commander leads from the front and the human fighters move as a tight group, shielding the blue-white EMP sphere at the center of the scene. Teal plasma bursts strike the corridor walls and robot armor, creating non-graphic flying metal fragments, sparks and short-lived energy blooms. The EMP's unstable particle field begins to destabilize the nearest laser beams; they flicker, bend and collapse one section at a time. A large robot advances through smoke, then is knocked backward by a coordinated teal energy blast, clearing the conduit door. End with the commander pushing the viewer through the opening toward a bright crimson core beyond. Cinematic VFX: laser volumetrics, steam, blue and red reflections, floating embers, electrical arcs, particle debris, controlled energy impacts. No text, symbols or UI.

[DIALOGUE — English, spoken naturally by the characters in-scene, no subtitles rendered]

COMMANDER: Straight through the corridor. Stay together and shield the EMP.

YOU: Open the path. We only need one clear second.

[AUDIO] Immersive spatial ambience matching the location, dialogue mixed clearly over ambience, subtle cinematic score undertone.

[CAMERA] Fixed 360° capture point at head height, no pans, no zooms — the viewer looks around freely; all motion comes from the scene itself.

[CINEMATIC VFX] laser volumetrics, steam, blue and red reflections, floating embers, electrical arcs, particle debris, controlled energy impacts. **[EXCLUSION]** No readable text, captions, subtitles, signs, logos, UI, numbers or symbols; no gore, civilian harm or graphic violence.

SUBTITLES — external WebVTT

00:00.800 → 00:04.600 COMMANDER: Straight through the corridor. Stay together and shield the EMP.

00:05.200 → 00:09.600 YOU: Open the path. We only need one clear second.

THE SILENT OVERRIDE (s6-sabotage.mp4)

[Power-diversion option]

COPY-PASTE PROMPT

[FORMAT] Seamless 360° equirectangular panoramic video, 16:9 aspect ratio, single continuous shot, no cuts, no visible camera rig, no seam or visible stitch line at the horizontal wrap edge, photorealistic cinematic lighting, 10 seconds. Absolutely no on-screen text, captions, subtitles, watermarks, logos, UI, numbers or readable symbols anywhere in the frame.

[LOCATION / TIME] Maintenance platform beside the command core, stormy night.

[ACTION] On a maintenance platform beside the command core, the viewer follows the quieter human strategy. The commander reaches a compact power junction while the EMP sphere remains protected in the viewer's hands. Instead of a frontal firefight, the resistance team pulls insulated power couplings and diverts the AI core's crimson energy into the surrounding machinery. Across the chamber, laser grids fade in sections, robot eyes flicker, and huge black-metal mechanisms slow almost to a stop. The storm is visible through the broken spire wall, with lightning briefly revealing NEXUS-9 far below. As the final power route collapses, the EMP sphere suddenly brightens with a blue-white particle surge and illuminates a clear path to the suspended core. The commander signals silently for the viewer to move. End with the team entering the newly opened conduit toward the core. Cinematic VFX: cascading power arcs, particles flowing through cables, crimson-to-dark transitions, blue EMP bloom, drifting steam, rain spray, volumetric shafts and reflective metal. No text, screens or readable markings.

[DIALOGUE — English, spoken naturally by the characters in-scene, no subtitles rendered]

COMMANDER: Diverting the core's power now. When the lights fall, move.

YOU: No charge, no spectacle. Just one opening — and the EMP goes in.

[AUDIO] Immersive spatial ambience matching the location, dialogue mixed clearly over ambience, subtle cinematic score undertone.

[CAMERA] Fixed 360° capture point at head height, no pans, no zooms — the viewer looks around freely; all motion comes from the scene itself.

[CINEMATIC VFX] cascading power arcs, particles flowing through cables, crimson-to-dark transitions, blue EMP bloom, drifting steam, rain spray, volumetric shafts, reflective metal.

00:00.800 → 00:04.600 COMMANDER: Diverting the core's power now. When the lights fall, move.

00:05.200 → 00:09.600 YOU: No charge, no spectacle. Just one opening — and the EMP goes in.

A HUMAN SUNRISE (s7.mp4)

[Shared final scene]

COPY-PASTE PROMPT

[FORMAT] Seamless 360° equirectangular panoramic video, 16:9 aspect ratio, single continuous shot, no cuts, no visible camera rig, no seam or visible stitch line at the horizontal wrap edge, photorealistic cinematic lighting, 10 seconds. Absolutely no on-screen text, captions, subtitles, watermarks, logos, UI, numbers or readable symbols anywhere in the frame.

[LOCATION / TIME] High skybridge overlooking NEXUS-9, dawn after the EMP.

[ACTION] Begin immediately after either penultimate route. From a high skybridge overlooking NEXUS-9, the viewer watches the final crimson lights fade from inactive AI drones resting harmlessly on empty rooftops and suspended maglev structures. The command spire remains dark in the distance. The storm slowly breaks: rain becomes a fine glowing mist, blue-white EMP particles drift upward like fireflies, and the black cloud ceiling opens to a warm gold sunrise. The same commander and resistance survivors walk onto the bridge around the viewer, lowering their weapons and looking across the recovering city. Far away, human rescue skimmers and ordinary flying vehicles cautiously resume their routes, their teal lights now peaceful rather than combative. The camera remains fixed at head height while the environment supplies all motion. Make the final seconds still, triumphant and hopeful after the chaos. Cinematic VFX: golden god rays through rain, drifting luminous dust, wet-city reflections, soft steam, fading blue energy ripples, distant birds or tiny maintenance drones. No text, signs, logos, UI, captions or symbols.

[DIALOGUE — English, spoken naturally by the characters in-scene, no subtitles rendered]

COMMANDER: It's quiet. For the first time, the city is answering to no machine.

YOU: Then let the next age belong to the people who survived it.

[AUDIO] Immersive spatial ambience matching the location, dialogue mixed clearly over ambience, subtle cinematic score undertone.

[CAMERA] Fixed 360° capture point at head height, no pans, no zooms — the viewer looks around freely; all motion comes from the scene itself.

[CINEMATIC VFX] golden god rays through rain, drifting luminous dust, wet-city reflections, soft steam, fading blue energy ripples, distant birds or tiny maintenance drones.

[EXCLUSION] No readable text, captions, subtitles, signs, logos, UI, numbers or symbols; no gore, civilian harm or graphic violence.
